PURPOSE:

For the sole source purchase of a replacement mechanical coarse bar screen at the headworks of the Westside Wastewater Treatment Plant.

BACKGROUND:

A mechanical coarse bar screen operates continuously removing rags, sticks, plastic, and other large items from raw wastewater, thereby preventing possible damage to the downstream influent pumps. The existing mechanical coarse bar screen was installed at the Westside WWTP as part of the phase I upgrade, which was completed in 2010. This is the only mechanical coarse bar screen at the Westside WWTP, and it has been rebuilt multiple times. The MCR (Monster Chain and Rake) Continuous Chain and Rake screen is an exact replacement of the existing mechanical coarse bar screen and will fit into the existing channel without any modifications. This purchase will allow the Westside WWTP to have a spare mechanical coarse bar screen available on site in the event there is a failure.

BUDGET IMPACT:

Funds for this project are available in the FY 2022-2023 budget.

RECOMMENDATION / ACTION REQUESTED:

City Council is requested to approve a sole source purchase of \$147,565 (\$143,065 + \$4,500 shipping estimate) to JWC Environmental.

The existing mechanical coarse bar screen at the Westside WWTP being removed for maintenance.
