Re: A petition from the Slow Down North Rotary Drive Committee

Date: June 4, 2018

Slow Down North Rotary Drive

We the undersigned would like to end the speeding that happens at all hours of the day and night on North Rotary Drive, a residential street. We have met with city officials, posted on social channels, and discussed this issue backwards and forwards. It's time to stop the studies and make a change. Now.

We want to walk our street without fear of getting killed, we have children and dogs who play in our front yards and bike and run, we drive our residential street and do not want to be zoomed around and tailgated, we want to maintain our property values, and we want to celebrate a high quality of life.

High Point is moving forward with ballparks and mixed-use development—let's create a walk-able, safe neighborhood for the residents who are already here. And who will be moving here as the city evolves.

It's time for a change. We want action, not words and studies and data diving and delays.

We want to move North Rotary Drive forward. We look forward to resolution.

Proposal:

The Stop sign that was installed at Farriss and North Rotary Drive a few years back has really helped with that stretch of

the road. Let's tackle the next stretch...

Think baby steps, ie Stop signs.

Perhaps a 4-way Stop at Westwood and North Rotary.

A 4-way Stop somewhere between Farriss and Ray.

Making North Rotary a 25-mile-per-hour street from Lexington to Chestnut and NOT having the speed limit change at the bottom of a hill that folks barrel down.

If Stop signs don't work, then other alternatives can be discussed.

Let's make this happen while school is out, and start the Fall fresh with new policies in effect.
