PURPOSE:

To utilize The Perkinson Company to upgrade the older Auma actuators to enable Ward Plant contractor to direct connect to all valves.

BACKGROUND:

Currently the Ward Pant is being upgraded electrically and this includes a new control system. Filters 1-4 have Auma actuators installed for control of valves. Auma actuators are the standard for Public Services. To interface directly to the new control system 16 actuators will need to be modified with new controllers. This will eliminate the requirement for a second interface panel. This will also make all actuators the same. This improvement will add additional life to the older actuators saving the City money and make it easier for Plants Maintenance to troubleshoot if an issue occurs.

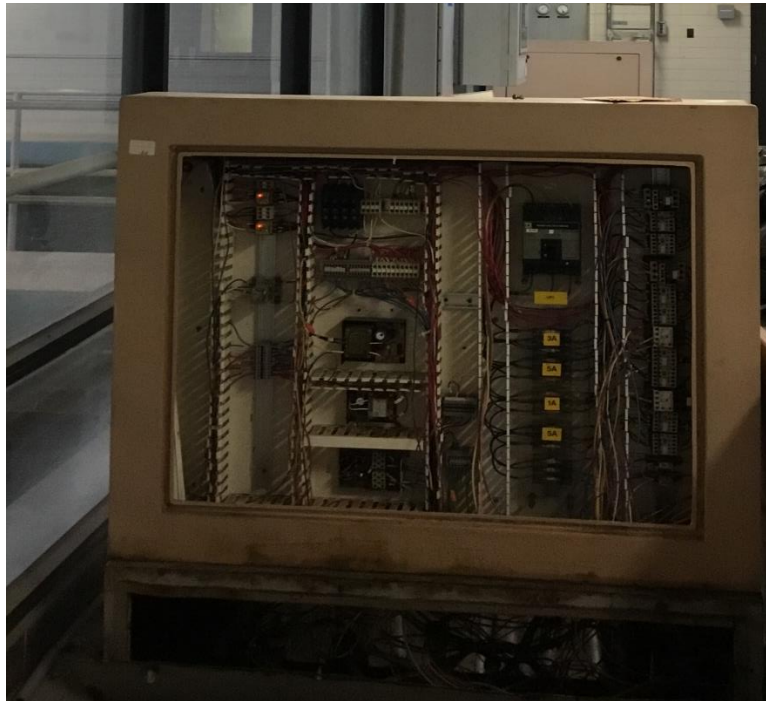

BUDGET IMPACT:

Funding is available in the 2020-2021 Budget.

RECOMMENDATION / ACTION REQUESTED:

Public Services is recommending that the Perkinson Company be approved as a sole source vendor to supply the parts and install the parts to upgrade the older Auma valves to interface directly to new control system at the Ward WTP for \$60,020.00.
